DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-13, 19-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:
Claim 11 is allowable for the reason that prior art does not teach or fairly suggest the step of selectively exposing (emphasis added) a portion of a fabrication tool to a plasma for a selected time interval wherein said selected time interval has a duration sufficient to reduce a polarization of said portion of said fabrication tool whereby interference with a motion of a device being processed by said fabrication tool is not observed. It should be noted that the whereby clause merely states the result of the selectively exposing step, which adds nothing to the patentability or substance of the claim. The recited range of voltage drop between the cathode and anode of the arc discharge plasma flood gun is only exemplary. As claimed, as selected fabrication tool can be subjected to a de-polarization step to reduce interference with a motion of a device being processed by the selected fabrication tool.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
